Experience

Shift Leader
Aerobotics

Feb 2019 - Jan 2020 (1 year)

- Run a shift of about 8 - 10 people from our outsource providers, allocating them work throughout the day and checking the quality of the work before it is released to the client.
- Identify and solve problems that are encountered
- Perform detailed work, prepare and maintain Microsoft excel spreadsheet/Google sheets.
- Communicate both verbally and in writing with my manager throughout the day.

Quality Control Coordinator
Aerobotics

Jan 2020 - Present (1 year 9 months +)

- Manage a team of quality control specialists and data validators, which includes performance management.
- Managing all client queries regarding data (delayed data as well as data issues).
- Managing any requests / questions on processing from our outsourced annotation centre (hold the day-to-day relationship with the on-the-floor management at the data annotation service company).
- Make sure data is being processed as quickly as possible at the right quality level within the team.
- Run any adhoc projects such as new annotation requirements with the teams.
- Management of the overall processing pipeline from QC through to Nursery annotations.
